

# If you are 70 or older, you can get the COVID-19 vaccine right now!

Call your local health department today to schedule your appointment to get vaccinated.

---

**COVID-19 vaccines are safe and effective.** COVID-19 vaccines are an important tool to help us get back to normal.

## **The benefits of getting vaccinated far outweigh the risks of getting COVID-19.**

- Starting **January 18, 2021**, all Utahns age **70 and older** can get vaccinated at your local health department.
- We expect to vaccinate other age groups, and those with underlying medical conditions who have not yet been vaccinated, sometime in March.
- The vaccine should be available for all Utahns sometime in the April to July timeframe.

---

## **You need to:**

- **Call, or visit the website for your local health department, to schedule an appointment.** You can find the phone number and website for your local health department at <https://coronavirus.utah.gov/vaccine-distribution/#lhd>.
- You don't need to get on a waiting list to get vaccinated, but you must have an appointment. You, or someone you trust, can register for your appointment on your health department's website.
- You can't just show up without an appointment because each local health department may have a different process for registration. **There are limited vaccines, so appointments will fill up quickly. It may take a few tries to get an appointment.**
- Bring a photo I.D. to your appointment.
- Get a 2nd dose of the vaccine a few weeks later. The local health department will tell you when you need to come back for your 2nd shot.

---

If you have questions about the COVID-19 vaccine, visit [coronavirus.utah.gov/vaccine](https://coronavirus.utah.gov/vaccine) or call the COVID-19 hotline at **1-800-456-7707**.
